# Among The Trees

Reclaimed timber, tools, hardware and gifts

## **Who we are**

Among The Trees is a reclaimed timber shop in Marrickville. We believe reclaimed timber should be accessible – so we save timber from demolitions or other discarded uses and making it available to the public through our shop and a range of woodworking classes.

There's nothing like working with wood, and to use and love a product that would otherwise have been sent to landfill or burned off helps keep the story of that piece alive.

Get in touch if you have any questions or want to know more about our wood.

bits and resurface the timber - cutting back the old, weathered layers to reveal the beautiful timber underneath.

### **3. You find the perfect piece in store**

This is where you come in! Visit us at Among The Trees and find what you're looking for. We stock a wide range of hardwoods and softwoods, from common timbers to more unusual and exotic woods, and we're always around the shop to have a chat and help you find something perfect for your project.

### **4. Machined to order**

Once you've found your timber, we can mill it to specific dimensions. We can square any uneven timber and reduce it to a desired thickness using our jointer and thicknesser, and our drop saw and table saw can be used to dock the ends, cut the timber into pieces, or rip it down the middle.

After

We can do more detailed or custom bespoke work with a bit of notice, like laminated timber bench tops, so let us know if you're looking for something specific.

## 5. Wood with a whole new life

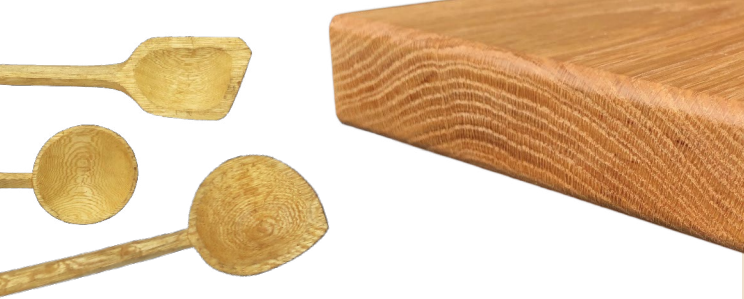

The end result is that piece of timber saved from landfill and looking beautiful in your home, garden, business, or public space. We can't get enough of how stunning this old wood looks, and know you'll feel the same way.

New to woodworking? Among The Trees offers a range of woodworking courses too - including spoon carving, picture framing and more!

Visit our website for more information on class dates, our timber, prices, machining, events, and much more.

# The Process

## 1. Saving timber from landfill

Traditionally, once timber has been used once it is sent to landfill. Estimates place the amount of timber going into tips around Australia at over 1.5 million tonnes annually. Surveys have observed that the most commonly observed wood in landfill is untreated timber.

All our timber is reclaimed, which means we've rescued it from going into the tip. We also accept donations by appointment – contact us for more info and collection times.

## 2. We give it some TLC

Once we've saved the timber, we give it a makeover before it's ready for you. Reclaimed timber often has hardware like nails, screws or bolts attached, and may have an existing finish or painted surface.

After taking out all the metal, we trim off any unstable or broken
